Program 2

Write a PL/SQL program using Procedures IN,INOUT,OUT parameters to retrieve the corresponding book information in library

```
-- Create a simple table for the library books
CREATE TABLE
                      library (book_id
 INT PRIMARY KEY, book name
 VARCHAR2(100),
 author_name
 VARCHAR2(100)
);
-- Sample data insertion
INSERT INTO library VALUES (1, 'Introduction to PL/SQL', 'John Doe'); INSERT
INTO library VALUES (2, 'Advanced SQL', 'Jane Smith');
-- Procedure to retrieve book information
CREATE OR REPLACE PROCEDURE get book info (
  p_book_id IN INT, p_book_name IN OUT
  VARCHAR2, p author name OUT VARCHAR2
) IS
BEGIN
  -- Retrieve book information based on the book id
  SELECT book name, author name
  INTO p book name, p author name
  FROM library
  WHERE book id = p book id;
  -- Modify book name if needed (optional, based on INOUT)
p_book_name := p_book_name || ' - Updated'; END;
-- Test the procedure
DECLARE v book name
